

The road sweepers Bagger KM 520 and KM 750 are the ideal complement to your excavator thanks to their robust and compact design. As standard, the road sweepers are equipped with an attachment plate for various attachment systems. Optionally, various adapters/quick hitches can be supplied which make the road sweeper ready for use within a few seconds.

Due to the manoeuvrability of the excavator, the road sweepers can also reach angled areas and vertical surfaces such as walls, ceilings or even roofs. The Bagger KM 520 and KM 750 are the ideal complement for every construction site.

**BAGGER KM 520** 1 - 6t

The Bagger KM 520 is operated as standard via a **centre drive**, with a powerful hydraulic motor. The brush made of 100% PP full body bristle has a brush diameter of 520 mm and is specially designed for sweeping close to the edge.

**BAGGER KM 750** approx. from 8t

The Bagger KM 750 is powered as standard by two powerful internal hydraulic motors. The brush rings have a diameter of 750 mm and a 100% PP trim with CrownLock system.

**BAGGER KM 520**  
1 - 6t
