

## GRASSLAND HARROWS

Düvelsdorf's European-built grassland harrows, available in widths ranging from 2 to 8 meters, offer unparalleled pasture improvement. The 3 or 4-row chain harrow ensures thorough aeration, leveling, and manure spreading, while also serving for seed covering, baiting, and cultivation finishing. This promotes pasture health and growth by removing thatch and moss, increasing air and water penetration, and facilitating access to sunlight for essential Vitamin D. Additionally, it aids in drainage, particularly in autumn for optimal grass seed germination over winter. Post-grazing, the harrow breaks up manure, distributing it evenly into the soil to prevent smothering and enhance fertilizer absorption. With wider models featuring 4 rows of chains, even dried-out manure piles are effectively managed. This natural fertilizer utilization reduces reliance on chemical alternatives, promoting cost-effective and sustainable pasture management. Integrated with three heavy-duty leveling bars, these harrows streamline operations, resulting in smoother, more manageable, and healthier pastures in a single pass.

### Features

- ✓ Manufactured in Europe
- ✓ Galvanised frame for maximum protection against corrosion
- ✓ Minimised wear of steel rings due to optimised shape of cast stars
- ✓ Combination stars made of high-quality grey cast iron
- ✓ 12 months warranty

Model	Working width	Transport width	Folding wings	Hydraulic Folding	Weight	3pt Linkage	Frame finish
Grassland harrow 2m, 3 rows	2.0m	2.0m	✗	✗	176 kg	CAT 1	Galvanised
Grassland harrow 3m, 3 rows	3.0m	1.75m	✓	✗	220 kg	CAT 1	Galvanised
Grassland harrow 4m, 3 rows	4.0m	2.1m	✓	✗	286 kg	CAT 1	Galvanised
Grassland harrow 4m, 4 rows	4.0m	2.1m	✓	✗	335 kg	CAT 2	Galvanised
